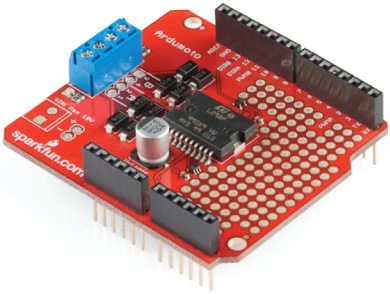
GET YOUR PROJECT IN GEAR WITH THE ArduMoto Shield ADD-ON

DESIGNED TO HELP YOU } UNLEASH YOUR INNER INVENTOR

What do robotic arms, RC cars, and automatically opening doors all have in common? They all use motors to make them move. The ArduMoto Shield connects to your Arduino Main board and gives you the power to control two DC motors. Imagine a cat door that responds to your kitty's meows at three in the morning so you don't have to. Now that's beautiful.



* Arduino Main Board sold separately

- 1 x ArduMoto Shield
- 2 x Stackable Headers 6-pin
- 2 x Stackable Headers 8-pin
- 2 x Screw Terminals 3.5mm Pitch (2-Pin)

Joystick Shield
