# LET YOUR GEEK SHINE

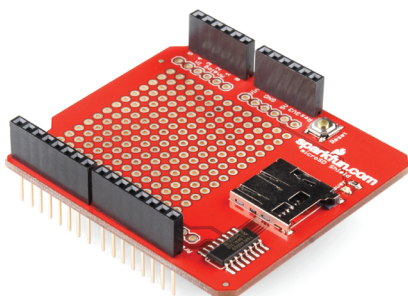

**MicroSD SHIELD** ADD-ON

# STORE DATA LIKE A PRO WITH THE **MicroSD SHIELD** ADD-ON

DESIGNED TO HELP YOU } UNLEASH YOUR INNER INVENTOR

Arduino is an awesome technology for many reasons – simplicity of use, a huge support network, and adaptability (to name a few). It is not, however, known for its data-storing prowess. That's where the MicroSD Shield comes in! Using this shield and a MicroSD card allows your Arduino to store the information your project generates. Logging thousands of GPS coordinates? Sure. Tracking the G-forces of your base-jumps? Yep. Logging the miles you're racking up in your marathon training? Yeah, you get the point – you're storing data like a pro.

- 1 x microSD Shield
- 2 x Stackable Headers 6-pin
- 2 x Stackable Headers 8-pin

\* Arduino Main Board sold separately

Joystick Shield

XBee Shield

ArduMoto Shield

GPS Shield

Proto Shield
