Notes:

1. In order to make the life longer, please set the input current below 80mA.
2. Electrical & Optical Characteristics consistency of same items all shipments.
3. Please use LEDs based on our datasheet.
4. LED is senstive to statics, be sure your equipments are anti-static when you use our LEDs.
5. Pay more attention to your heat dissipation system when you use it, the better heat dissipation, the longer LED lifespan.
